

Alejandro Chavez

Computer Science Engineer

chavezalejo85@gmail.com | +593 999274384 | linkedin.com/in/alech7

Education

Master's in Artificial Intelligence
Universidad San Francisco de Quito

August 2026 – August 2027

Computer Science Engineer
Escuela Politécnica Nacional

September 2021 – February 2026

Experience

Freelancer

April 2026 – Present

- Develop backend services with .NET (C#) and mobile applications in Swift for clients.
- Created a natural-language appointment scheduling bot using n8n, WhatsApp Business, and Next.js.
- Built a RAG system to retrieve AI agent memories per user.
- Enabled direct contact with the doctor through the appointment workflow.

Busmatick Group

April 2026 – August 2026

- Provide support to users and internal systems.
- Review logs, databases, and user accounts to troubleshoot incidents and support operations.
- Automate processes to improve support workflows and system reliability.

Ecuavisa

August 2025 – February 2026

- Mapped processes and automated them with AI (LLMs, computer vision, and ML).
- Built solutions using Google Cloud, the OpenAI platform, Apache Spark, and Kafka.

BlueHat Corp

March 2025 – August 2025

- Performed social engineering, OSINT, and web application penetration testing to assess exposure, reputational risks, and security posture.
- Supported cybersecurity governance efforts aligned with CGCI, including follow-up based on ISO/IEC 27001.

SLB Internship

October 2024 – March 2025

- Power Platform developer intern, designing and developing PowerApps solutions to streamline diesel usage tracking and asset management.
- Implemented forms and business rules to validate data and improve the quality and accuracy of recorded information.
- Contributed to Dataverse data models, UX/UI components, and agile project management via Azure DevOps.

IQVIA Internship

March 2024 – May 2024

- Internship in database support and administration, automating and verifying weekly processes using ETL, SQL, and PowerShell.
- Designed and developed dashboards in Tableau and Power BI for KPI visualization and tracking.
- Designed and developed tailored queries to address unique client needs and ensure accurate data delivery.

Personal Projects

Busqua

busqua.com

Real-time product search platform connecting suppliers, location, and contact details.
Technologies: AWS, Odoo, Elixir, Python, SQL, and React.

Retrieval Augmented System

Built a RAG system to retrieve data from a custom corpus and generate concise, context-aware summaries.

Certifications

AWS Academy Cloud Foundations

Amazon Web Services (AWS)

Issued: July 2025

Network Defense Essentials

EC-Council

Issued: January 2025 – Expires: January 2028

Credential ID: ECC5837692041

Publications

"Design and Evaluation of a RAG-Based Semantic Search Pipeline for Scientific Information Retrieval" — Pending publication.

A systematic review covering the fundamentals of RAG systems, key components, implementation pipelines, applications in scientific research, and current challenges.

Languages and Skills

Programming: Python, Java, JavaScript, C# (.NET backend), Swift, HTML, CSS

Tools: Kali Linux, SQL, React, Azure, PowerShell

Methodologies: Scrum, XP

Other: Fluent English, Basic French, Cisco Systems knowledge
